ABOUT SCIART EXCHANGE

SciArt Exchange aims to engage and prepare the world to creatively solve space, science and technology challenges together.

The nonprofit offers multi-disciplinary art contests, artwork tour events, consulting, training and community resource services. Art-integration techniques provide motivating activities that train not only facts and analytical processes but also much-needed communication, creativity and collaboration skills. Art also enables a broad discussion of not only the “how and what” but also the “why” of exploration and development, considering issues ranging from technical and strategic to ethical, emotional, and social.

Dr. Jancy McPhee, a neuroscientist by training, began the foundational work for SciArt Exchange while a space life scientist at NASA.

THE INTERNATIONAL SPACE STATION
BOUNCED OFF THE MOON

TERRESTRIAL VENUES INCLUDE:
CINEMARK THEATERS
NATIONAL GEOGRAPHIC HQ
OUTDOOR ADVERTISING ASSOCIATION OF AMERICA
MANY MORE!

ANNUAL SPACE YOUTH ART COMPETITIONS & TOURS

Based on the Humans in Space Youth Art Competition begun in 2010, we will hold annual, international, multimedia art competitions inviting youth 10-18 years old to learn about space exploration and relay their visions of the future. After each contest, the artwork will be showcased in displays and performances worldwide.

These activities are a motivating, interdisciplinary, educational activity for children, employing the latest STEAM (Science-Technology-Engineering-Art-Math) education approaches. They will have broad appeal and be accessible to students from all backgrounds and socio-economic levels. They will train much-needed communication, creativity and teamwork skills as well.

These recurring contests and tours will keep the public informed, excited and actively participating in the future of space exploration, as we progress to live, work, and do science on the Moon, Mars and further into deep space.

“I realized that words coming from the pen of a normal girl can take you places, literally and metaphorically...an unforgettable and unparalleled memory.

Arundhati Chowdhury

Age 15, India, 2012 Youth Art Competition

“SciArt Exchange demonstrates the power of bringing science and engineering together with the arts!”

Nicole Stott

Astronaut, Artist, Educator
